

METEOR

1200

SINGLE SPINDLE DRILLING LINE

The METEOR-1200 is developed to drill holes in various kinds of profiles faster with ease. It is the most space efficient drill line and ideal for small-mid size fabricators. The METEOR process various steel profiles including beams, angles, flat sheets and any suitable geometries. It also performs milling for slots, pockets with its advanced control system. The METEOR is available with the lengths of 20, 33, 46, 59, 72, 85 feet. The METEOR is also equipped with sub-axis that enables to control the spindle within 10" in the length of beams without repositioning.

ADVANTAGES AT A GLANCE

- The most affordable drill line
- Versatile processing capacity
- Small floor space
- Full CNC Control
- 20 HP Spindle Motor Power
- 6-Station Tool Changer
- Laser Automatic Tool Measurement &
- Material Zero Referencing
- High positioning tolerance and repeatability
- User-friendly interface
- Fast, accurate and maintenance-free
- Worldwide spare parts availability

Controller	Siemens	
Working length	feet	20-33-46-59-72-85
Profile height	inch	2-47
Profile width	inch	2-47
Support table height	inch	39,4
Length	feet	Working length + 11,8 feet
Height	inch	124
Width	inch	118
Weight	lbs	Leng ht depended
Maximum tool length	inch	12,6
Drilling capacity	inch	3/8-1-1/4
RPM	rpm	10-1000
Spindle Motor Power	HP	28
Total Power	HP	60
ATC station	Nos.	6
